EDUCATION

Feb 2026 - Jul 2026 KSHRD CENTER

- Full-Stack Development
- Basic Course : February 02nd - July 09th, 2026, Mon-Fri, 7.5 hours per day, 810 hours
- JAVA : J2SE (Basic Java and OOP concepts), J2EE (Maven and MVC pattern)
- WEB : HTML, CSS, JavaScript, CSS Flexbox, Tailwind CSS, JSON, Next.js,
- SPRING : Spring Boot, MyBatis Data Access, Spring RESTful Web Service, Spring Security, JSON Web Token, Thymeleaf Engine
- Database : Data Modeling, PostgreSQL, SQL(Basic SQL)
- Additional Courses : Linux, Docker, Version Control (GitHub) and UI/UX, AI Coding tool (Cursor, Claude Code, Codex, etc.)

2024 - PRESENT SETEC INSTITUTE

- Management Informa
- GPA: 3.28

2023 - 2025 PUC-INSTITUTE OF FOREIGN LANGUAGE

- Diploma of General English

SKILLS

- Backend Development: Java, Spring Framework (Spring Boot), Object-Oriented Programming (OOP), System Design
- Frontend & Full-Stack: Next.js, React, Tailwind CSS, REST Client Integration
- App Security & Infrastructure: Spring Security, JWT/OAuth2, Linux OS Administration, Docker, CI/CD

LANGUAGES

- **Khmer:** Native
- **English:** Fluent

PROFILE SUMMARY

Backend Developer specializing in Java and Spring Boot, with a strong foundation in Object-Oriented Programming (OOP), relational databases (SQL, RDBMS), and secure RESTful API design. Experienced in building full-stack applications, integrating third-party systems like KHQR payments, and deploying containerized environments using Linux, Nginx, and Docker. Adept at cross-functional collaboration, version control with Git, and implementing robust security frameworks (JWT, Spring Security) to deliver scalable, reliable backend solutions.

WORK EXPERIENCE

KSHRD Center - SnapPOS Full-Stack POS Platform

Jan 2026 - Jul 2026

Full-Stack Developer (Group Final Project)

- Developed and integrated applications based on agreed design and architecture using Java (Spring Boot) and OOP principles, implementing role-based access control with Spring Security across POS endpoints.
- Designed and documented comprehensive RESTful APIs, facilitating seamless integration with third-party systems like the Bakong KHQR gateway via reverse proxies and middleware.
- Administered deployment environments on Linux servers, configuring Nginx, Docker, and dual CI/CD pipelines (GitHub Actions) while strictly adhering to SDLC methodologies.
- Tested patches and conducted root-cause analysis on production APIs to resolve vulnerabilities and ensure high system integrity in alignment with risk policies.

PROSETH SOLUTIONS CO., LTD.

May 2025 - December 2025

IT Intern (Systems & Infrastructure Support)

- Assisted in supporting payment integration services and infrastructure operations, focusing on Bakong-related support systems and transaction monitoring.
- Administered and maintained Linux-based server environments, configuring Nginx reverse proxies and managing Docker containers for reliable application hosting.
- Maintained PostgreSQL databases, assisting with schema backups, basic performance monitoring, and query verification to ensure data consistency.
- Collaborated with senior engineering staff to troubleshoot network connectivity, verify API payload requests, and track deployment issues using Git.
